Experience

Web Developer

All Tech Global • Ahmedabad,Gujarat 01/2025 - Present

Laravel Developer

- Developed and maintained scalable, secure RESTful APIs using Laravel 12.
- Implemented authentication with Sanctum and fine-grained role-based access control using Spatie Permissions.

WordPress Developer

- Customized WordPress themes and plugins to build fully responsive, SEO-optimized business websites.
- Created custom post types, shortcodes, and widgets to meet client-specific functionality needs.

Projects

Pure Wear – E-Commerce Platform
ReactJS, Laravel, Sanctum, RESTful APIs

- Developed a fully functional e-commerce platform with seamless shopping experience, secure checkout, and robust admin panel.
- Built a responsive, dynamic frontend with ReactJS, React Router, and Context API for efficient state management.

Realtime Chat App

Built with MERN Stack | Socket.IO | Clerk Auth

- Developed a full-stack chat application supporting real-time one-to-one messaging using Socket.IO.
- Integrated Clerk for authentication and MongoDB for persistent chat history.
- Designed responsive UI for seamless desktop and mobile experience.

Edemy – Full Stack LMS (Learning Management System)

Built with MERN Stack | Clerk Auth | Stripe Integration

- Developed a responsive LMS platform enabling course creation, enrollment, and secure payments.
- Implemented user authentication with Clerk and Stripe integration for real-time payment processing via webhooks.
- Managed course content and video uploads with dynamic dashboard functionality.
